

Integrated Management System Policy for Quality, Environment, and Occupational Health and Safety

Sharjah Chamber of Commerce and Industry is committed to developing its abilities to serve and develop the economy of the U.A.E in general and that of Sharjah emirate in particular, to earn its unique status on the map of global business, utilizing goals that are based on tenets of excellence and sustainability, by applying the Integrated System of Management for Quality (ISO 9001:2015), Environment (ISO 14001:2015), and Occupational Health and Safety (ISO 45001:2018), with focusing on:

- Providing members with valuable information and services and coordinate investment opportunities that allow them to grow, prosper and compete more in the global market.
- Constant development of exhibitions that Sharjah Chamber of Commerce and Industry organizes or participates in and giving special attention to details to present the best to all segments of clients.
- Improving staff performance through training to achieve the desired efficiency and constant improvement of activities and services provided to all clients, suppliers, and strategic partners to gain their trust and satisfaction.
- Obeying the law and legislation concerned with best practices for the environment and occupational health and safety.
- Protecting the environment, and positively influencing it through encouraging recycling and preventing pollution
- Improving the efficiency of energy consumption and conserving the overall consumption of non-renewables.
- Specifying and assess the risks related to occupational health and safety, and environmental impacts to continuously gain control over them. Prevent injuries and occupational hazards to ensure the safety of the staff, indoor workers, clients, and society.
- Handling and correcting failures or shortcomings in the sectors of the environment and occupational health and safety and fill the gaps identified through the audit, inspection, and investigation of the incidents.
- Developing emergency plans and test them regularly to guarantee their readiness and effective response when needed.
- Spreading the policy, objectives, and awareness about the requirements of the Integrated Management System for Quality, Environment, and Occupational Health and Safety on regular basis to the employees, indoor workers and clients.
